The Diversey Pur-Eco range is part of our global commitment to providing safe, healthy, and environmentally sustainable solutions for our customers. Our products offer the perfect blend of trusted cleaning efficiency and respect for the environment.

As a market leader, we are committed to addressing every aspect of kitchen care. To support this goal, we have developed innovative new eco-certified formulations to expand our existing range.

Diversey Pur-Eco products meet the strict environmental and safety criteria of the internationally recognized European Ecolabel and/or Nordic Swan.

Their efficacy is guaranteed by rigorous customer testing, backed by Diversey's expertise and decades of experience in developing environmentally friendly, sustainable solutions.

Ecolabel: introduced in 1999, is a voluntary scheme designed to promote products and services that are more environmentally friendly. Products must meet strict criteria and pass compliance tests, verified by an independent organisation.

Nordic Swan: is common to the Nordic region, introduced in 1989 and updated every 3 years. It establishes strict criteria for the environmental impact of a product and can also impose requirements on quality and function.

A force for sustainable change
