

Benefits of Cooling Tower Cleaning

Regular cleaning and disinfection help keep cooling towers running optimally and minimize total cost of operation.

Risks of Not Cleaning

- Microbiological Fouling Problems
- Amplification of *Legionella* Bacteria
- Total Evaporation Deposits
- Under-Deposit Corrosion
- Blocked Nozzles, Heat Exchangers, and Strainers
- Reduced Cooling Efficiency
- Equipment Damage and Downtime

VS

Benefits of Regular Cleaning

- Maintain Cooling Efficiency
- Helps Reduce *Legionella* Risks
- Optimize Chemical Treatment Effectiveness
- Sustain Water Flow
- Preserve Physical Appearance
- Reliable Operation
- Increase Equipment Lifespan

It is recommended that all cooling towers be cleaned at minimum once per year, twice per year preferred.
