CHEM-AQUA™
An NCH Company

Healthcare Industry Solutions

Your Trusted Water Treatment Partner

Increasing costs, regulatory compliance, and the need to meet sustainability objectives continue to force the healthcare industry to look for innovative ways to ensure patient safety and save money. As a premier water solutions provider to a third of the acute healthcare facilities in the United States, Chem-Aqua understands these needs, and has the experience needed to provide cost effective and sustainable water treatment solutions. We are also an approved supplier with all major Group Purchasing Organizations (GPO).

Chem-Aqua's customized treatment programs do more than just protect your building water systems, they also help you maximize their life, efficiency, and reliability while keeping energy, water, and maintenance costs to a minimum. We also have the experience, expertise, and tools necessary to help facilities make data-supported decisions for managing pathogen risks associated with their building water systems.

Reduce Energy & Water Consumption

Improve Equipment Efficiency

Reduce Operating & Maintenance Costs

Risk Management Solutions

Program Benefits

Effective water and process solutions to help:

- Reduce water and energy costs
- Prevent equipment downtime
- Maintain operating efficiency
