

# THE INTERNET OF WATER TREATMENT

Online connectivity to your data directly impacts the success of your water treatment program.

**aquaDART® Automation**

The aquaDART® employs real-time sensors and Direct Analysis and Response Technology to continuously monitor and adjust water treatment programs and achieve optimal results that meet changing system demands.

**MyChemAqua Portal**

MyChemAqua gives you online access to all your program data with dashboard analytics to quickly monitor program performance and detect emerging problems.

**bioDART® Biofouling Monitors**

The bioDART® continuously measures the potential for biofilm deposits to form in cooling water systems, helping identify upset conditions and allowing for early warning and preventative action.

**SMARTLink® Tank Level Monitoring**

Using ultrasonic wave technology, SMARTLink® accurately measures the liquid level in tanks and transmits your data to the MyChemAqua portal dashboard. The system alerts for high and low levels or rapid level change.

**SMART Reporting**

Our SMART reporting platform provides you with comprehensive, customizable documentation of service visits and system operations. Summary reporting with exceptions clearly noted ensures you get the most out of your water treatment program.
