

PREPACKAGED Chemical Feed & Control Systems

What if there were a simpler way to manage treatment chemicals and system parameters? Chem-Aqua has revolutionized industrial water treatment technology by providing an easy to install solution guaranteed to save time and reduce costs.

COMPETITOR'S SYSTEM

- Many individually shipped, complex components
- Lead times extended as multiple components arrive separately in numerous boxes
- Must be built and assembled on site
- Unreliable quality and operation with site-built system
- Requires professional and costly installation

VS.

CHEM-AQUA SYSTEM

- Preassembled board mounted system
- One box, one delivery date, one tracking number, no extended lead times
- Pre-assembled with pumps, controllers, flow manifolds, and inlet and outlet connections
- Pressure tested for leaks prior to shipment
- Ready for easy installation upon arrival

Chem-Aqua's preassembled chemical feed & control systems are manufactured at our in-house equipment manufacturing facility, offering standard or custom designs that meet the unique mechanical, operational, chemical, and personnel requirements of each application.

BACKED BY AN EXPERT IN-HOUSE TECHNICAL SUPPORT TEAM
Chem-Aqua provides professional, knowledgeable and quality service with a fully stocked warehouse to ensure complete client satisfaction.
