

# Best-in-class Pool & Spa Solutions for Hospitality

**CRYSTAL CLEAR CONFIDENCE  
FOR YOUR GUESTS**

 **Diversey**  
A SOLENIS COMPANY

## ELEVATE YOUR **HOTEL POOL & SPA EXPERIENCE** WITH PERFORMANCE. SIMPLICITY. CONSISTENCY.

Pool water **isn't just water**, it's part of a story **your guests will remember**.

It's a **safety standard** they trust and a **brand signature** they can see, feel and share.

In today's hospitality, few amenities influence guest perception as strongly as the pool. Whether it's a serene wellness retreat or a vibrant city rooftop infinity pool, **your pool is more than a place to swim**, it's a living reflection of your attention to detail.

Visibly clear water isn't always clean, and not all pool hygiene risks are easy to detect. In fact, **some of the most dangerous threats to pool hygiene and guest safety are completely invisible to the eye**. And in hospitality, what's invisible can be the most damaging.

**Delivering consistently safe, clean, and luxurious water** quality isn't easy.

**It requires precision, expertise**, and the **right technology** to create a pool and spa experience that guests will remember for all the right reasons.

Because in hospitality, **your water speaks for your brand** and it's all about delivering a crystal clear experience.

# INVISIBLE RISKS. **VISIBLE PROTECTION.**

## PEACE OF MIND 24/7 FOR HOTEL POOL SAFETY.

The **HTH™ EASIFLO SYSTEM** takes the guesswork and risk out of pool disinfection and works around the clock to protect what your guests can't see, ensuring every swim meets the highest standards of cleanliness, hygiene, comfort and care.

1

**HTH™ EASIFLO™ BRIQUETTES**

2

**HTH™ EASIFLO™ Feeder**

3

**HTH™ CYCL'EAU First control system**

The combination of these 3 HTH products guarantee regulated, reliable and simple disinfection, enabling the full and safe automation of your pool treatment.

## **CHOOSE HTH™ EASIFLO SYSTEM, A MODERN POOL WATER TREATMENT FOR HOSPITALITY**

Your pool isn't just an amenity, it's part of your brand. Guests judge you by the clarity, comfort, and safety of your water. **HTH™ EASIFLO SYSTEM** delivers performance, simplicity and responsible water treatment every day.

### **GUEST EXPERIENCE**

#### **Water that represents your brand:**

- Crystal clear water, even in high peak season
- Consistent chlorine disinfection, even against chlorine-resistant threats
- pH stability means no skin or eye irritation
- Safe, enclosed handling
- Immaculate waterlines and tiles

### **OPERATIONAL EFFICIENCY & SAFETY**

#### **Do more with less effort:**

- Stabilizer-free formula prevents overstabilization and helps maintain optimal water quality
- Reduces human error
- Ensures continuous protection with precise, automated dosing
- Minimal manual input means time savings for your team
- Fewer equipment failures = more control, less disruption

### **RESPONSIBLE HOSPITALITY**

#### **Operate responsibly without compromise:**

- Up to 50% less water & energy use
- Compact briquettes cut plastic waste and reduce transport
- Long shelf life = fewer deliveries
- No stabilizers = fewer backwashes
- ESG & compliance ready

The briquettes developed by **HTH™** to be used with the **HTH™ EASIFLO** feeder.

## REGULAR DISINFECTION

- Calcium hypochlorite: stabilizer-free 7g chlorine briquettes containing anti-scale agent
- Continuous chlorination for the destruction of algae, viruses and bacteria including legionella in commercial swimming pools and spas
- Use with HTH EASIFLO feeders
- Complies with EN 900 standard

## CHARACTERISTICS

- 7g quick-dissolving tablets
- Disinfectant, algacide, and anti-scale action
- Average chlorine equivalent content of 68% at date of manufacture
- Minimum chlorine equivalent content is equal to 65% at date of manufacture
- Minimized production of insolubles (less than or equal to 4% on distilled water)
- Formulation contains a chlorine-stable anti-scaling compound
- Free of isocyanuric acid (stabilizer)
- Can be used in hard water (high TH)
- Compatible with all filtration equipment
- Minimal outgassing on storage compared to isocyanurates

Dose rate:  
1kg = 100m<sup>3</sup> = 1 day

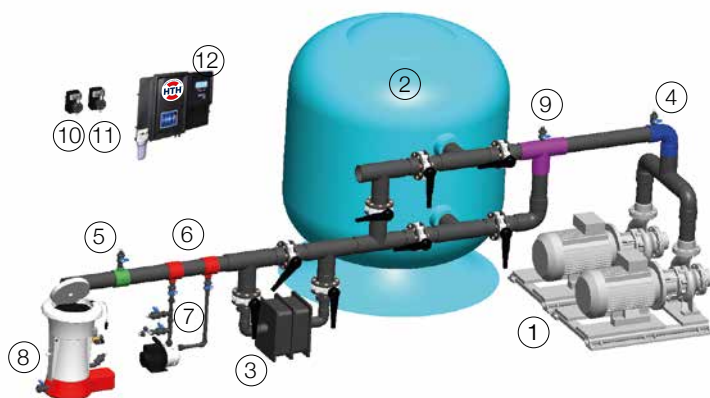

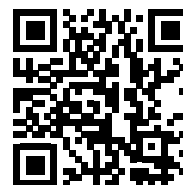

Composition:  
Calcium hypochlorite, 7778-543, 99.10%

### DID YOU KNOW?

The HTH BRIQUETTE contains on average less than 4% insolubles (in distilled water).

## HOW DOES A FEEDER WORK?

Chlorine briquettes are contained in a dry hopper inside the feeder system. When the controller indicates that chlorine is required in the pool, the filtered pool water enters the feeder to be sprayed onto the briquettes, thereby producing a chlorine solution that is immediately injected into the pool circulation system using a venturi system.

- ① Main circulation pump
- ② Filter
- ③ Heat exchanger
- ④ Controller inlet (between the pump and filter)
- ⑤ pH injection
- ⑥ By-pass for HTH EASIFLO compressor
- ⑦ Venturi kit / Inlet kit
- ⑧ HTH Easiflo FIRST feeder
- ⑨ Flocculant injection
- ⑩ pH dosing pump
- ⑪ Flocculant dosing pump
- ⑫ HTH CYCL'EAU Pro control system

## HTH™ EASIFLO™ First 10

Feeder to use with HTH™ briquettes to produce a constant chlorinated solution.

- Ideal for hotels, therapy pools and leisure centers, with pools ranging from 1m<sup>3</sup> to 150m<sup>3</sup>
- Easy to install, use and maintain
- No complex feeder pump or injection system required
- Provides ready-to-use chlorinated solution on demand
- Can be used with an automatic controller system
- Very small footprint

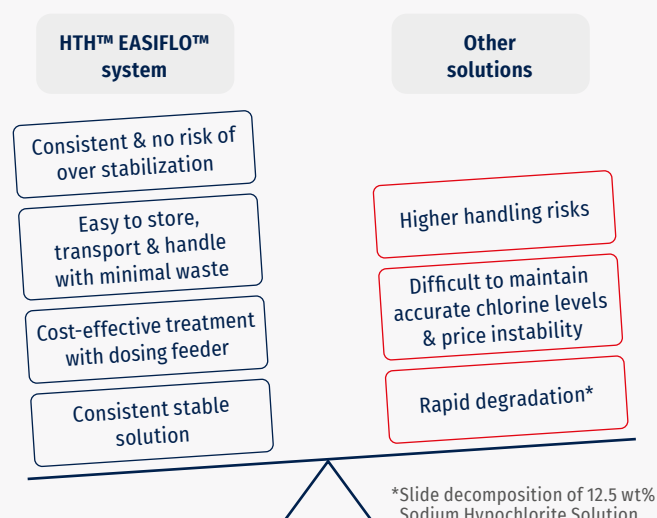

## HTH™ CYCL'EAU™ First

Amperometric control system that analyses and automatically adjusts the chlorine and pH levels of the pool.

- **Economical:** Lowers user costs and sensor maintenance. Proportional control prevents overdosing of chemicals.
- **Intuitive:** Directly displays key parameters (temperature, pH, chlorine) with a simplified user menu. Calibration is accessible via a single button.
- **Precise & reliable:** Amperometric membrane sensor is unaffected by water conductivity, ensuring accurate chlorine readings. Proportional control keeps chlorine and pH close to target thresholds.
- **Versatile:** Works with stabilized and stabilizer-free water. Data can be exported (display, computer) via CYCL'EAU link options.

### HOW CAN WE MAKE A DIFFERENCE TO YOUR POOL OPERATIONS **TOGETHER?**

# YOUR POOLSIDE REFLECTS YOUR STANDARDS

It's not just the water in the pool that shapes your guests' experience, it's the entire poolside and wellness journey. After swimming, their eyes hit the floor. Clean, safe, and spotless surroundings leave a lasting impression.

## THE TASKI DIFFERENCE

### Superior cleaning performance

- TASKI scrubber driers outperform manual cleaning methods with 10× more contact pressure and 99% water pickup in a single pass

### Improved safety

- TASKI patented squeegee and Twister™ diamond pads leave floors instantly dry, clean and slip-resistant
- Intelligent solutions like IntelliBac further enhance hygiene

### Elevating brand & guest experience

- Reinforcing premium brand image and maintaining pristine cleanliness with autonomous machines
- Improving floor condition and image with Twister diamond pads

### Minimal guest disturbance

- Cordless design and autonomous cleaning with minimal human interaction for discreet cleaning

### Truly integrated solutions

- The one-stop-shop provider for machines, floor pads and chemicals tailored for best combined performance

### Global reach

- Presence in 80+ countries and 1,700 service providers for consistent quality worldwide
- Global range, certification and after sales services to ensure optimal uptime of the fleet

# SURROUNDINGS **MATTER**

A single thing like a dirty lounge, sunscreen stains, a faint odor or limescale, can turn relaxation into disappointment.

These aren't minor oversights, they're mood breakers and **why superior hospitality means caring for every surface, every space, every moment.** Even when hygiene is technically sound, visible care is what builds trust. Guests want to see it and when they don't, they assume it's missing.

## EVERY DETAIL COUNTS.

## WE MAKE IT POSSIBLE WITH COMPLETE SOLUTIONS FOR:

**Laundry**

**Odor Control**

**Floor Care**

**Showers**

**Personal Care**

**Because every detail they notice reflects the brand standards you keep.**
