

## HTH EASIFLO™ BRIQUETTE 7G

Available in 25kg

Use only in HTH EASIFLO™ feeders

HTH EASIFLO™ feeder is based on the exclusive use of HTH EASIFLO BRIQUETTE 7g

No risk of over-stabilization. 70% available chlorine content.

Unique 7g 'pillow-shaped' briquettes ensures great efficiency with minimal wastage for operator safety.

HTH EASIFLO 10 feeder doses the solution of HTH Calcium Hypochlorite into the pool circulation system.

### How to use

1

When handling this product, it is important to ensure your safety by wearing the appropriate PPE (chemical resistant gloves). Always check your local requirements for PPE.

3

Fill the upper part of the feeder only with HTH EASIFLO BRIQUETTE 7g by opening the lid. Then close it again.

2

HTH EASIFLO BRIQUETTE 7g are loaded into the hopper at the top of the feeder by opening the lid. Fill the hopper to ensure you have enough for 1-2 days of operation.

4

To ensure your safety, it is forbidden to mix stabilized chlorine with non-stabilized chlorine or any acid with chlorine.

Any use other than in accordance with this guide or with a different chemical product is considered to be non-compliant and must be avoided. Any liability or resulting damage caused by non-compliance with this manual.

Check the HTH Easiflo 10 Operational Manual for the required cleaning and maintenance tasks.

Check SDS for detailed information
